

MICROWAVE POPCORN are currently packed in paper that includes a metalized PET plastic sheet.

Eniter has successfully completed a sustainable r&d project, thanks to which we have obtained **eni Wave PALOMITAS**, a **100% paper microwaveable packaging for popcorn**.

- ✓ **It does not contain plastic.**
- ✓ **100% special greaseproof paper from renewable sources.**
- ✓ **Recyclable in the paper waste bins.**
- ✓ **No oil leakages** through the sheet or the joints.
- ✓ Cooking time similar to current packaging.
- ✓ **Minimum loss** due to unpopped or burnt kernels, equal to or less than in conventional packaging.
- ✓ **It is recyclable**, it does not use plastic and is fully manufactured in paper from renewable sources, thus favoring the **circular economy**.
