

eniter

## Directly to the microwave!

The hustle and bustle of daily life, along with the need for healthy and simple eating, will make this packaging the star, specifically designed to simplify the process of **COOKING VEGETABLES IN THE MICROWAVE**. Simply place our container **directly in the microwave**.

**Eniter** offers an innovative container with very specific technical characteristics: it incorporates **materials that are durable** enough not to be damaged during their useful life, can withstand high temperatures, and **do not contain any substances** that could affect or contaminate food.

**eni Wave® VEGETALES** It allows food **to be preserved in perfect condition** and enables packaging in a protective atmosphere, **with the option to use recyclable and recycled materials**.

*More convenient, practical and simple*
